### EQUAL RIGHTS FOR ALL

Government cannot be present at all times and in all places to ensure that people treat each other fairly. Instead, the Natural Law Party intends to reduce prejudice and bigotry in society through more effective educational programs that develop broad comprehension, increased intelligence, and improved moral reasoning, and by reducing social stress that leads to fear and divisiveness. These programs will help create a unifying influence among our citizens and throughout society.

---

The U.S. Constitution guarantees the rights of all American citizens, and the Natural Law Party would support any legislation deemed necessary to uphold these constitutional rights for women and for minorities. At the same time, the Natural Law Party recognizes the difficulties in “legislating” equality: equal rights legislation has not succeeded in eliminating discrimination.

Natural law is that basic element in the universe that constantly nourishes the life of every individual and every living species. The Natural Law Party is the only political party that is based on this universally nourishing quality of natural law. Until now, democracy has been willing to compromise the interests of the minority for the sake of the majority. This is because democracy has so far been based on limited principles of man-made law, which are not sufficiently comprehensive to be simultaneously nourishing to everyone. When such principles compromise the interests of the minority, inevitably some segments of our population remain unfulfilled. The result is an increase in stress and frustration, which inevitably erupts as crime, sickness, and other problems throughout society.

By basing its administration on the most universal principles of natural law, the Natural Law Party’s comprehensive, prevention-oriented solutions to America’s problems are capable of providing universal nourishment, protection, and fulfillment to all citizens of the nation, including all the diverse groups that compose the richness and plurality of our great society.

# A REASON TO VOTE

- √ **Ending special interest control of our politics** by eliminating PACs and soft money, establishing public sponsorship of election campaigns, and prohibiting lobbying by former public servants.
- √ **Ensuring a strong economy** through powerful pro-growth tax and fiscal policies, and through proven education, job training, and apprenticeship programs that will ensure a highly qualified and productive work force.
- √ **Cutting taxes deeply and responsibly** by reducing government waste, fraud, and the national debt, and by implementing cost-effective solutions to costly social problems, while protecting crucial programs such as Social Security and Medicare.
- √ **Creating a true health care system** - as opposed to a disease care system bought and paid for by special interests - by supporting prevention-oriented health care programs proven to prevent disease, promote health, and save money in the best possible way, by keeping people healthy.
- √ **Creating energy self-sufficiency** by ending our costly addiction to foreign oil and developing renewable, safe, nonpolluting energy resources such as wind and solar – saving billions of dollars in health and environmental costs.
- √ **Strengthening education** by supporting programs that develop the student's full potential through curriculum innovations proven to increase intelligence, creativity, and academic performance.
- √ **Preventing crime** – not warehousing criminals – through effective criminal and drug rehabilitation programs, and through proven programs to reduce high levels of individual and societal stress.
- √ **Safeguarding America's food supply** through sustainable, organic agricultural practices proven to produce healthy, high-quality food without hazardous chemical fertilizers and pesticides.
- √ **Mandatory labeling and safety testing of genetically engineered foods**, and a moratorium on the release of these experimental life-forms into the environment until proven safe.
- √ **Promoting more prosperous and harmonious international relations** by shifting our meddlesome and invasive foreign policy away from the export of weapons towards the export of U.S. know-how in entrepreneurship, education, sustainable agriculture, and environmental technologies.
