CREATING PERMANENT PEACE

Research shows that terrorism is fueled by deep-seated social stress—including acute racial, ethnic, and religious tensions. The Natural Law Party supports scientifically verified approaches to prevent terrorism, reduce crime and eliminate warfare, approaches that diffuses such stress, disarming terrorism at its very basis, and thereby preventing terrorist attacks before they begin and creating a permanent peace.

As you sow, so shall you reap! The United States continues to sow the seeds of death, destruction, stress and tension throughout the world. These seeds grow into the hatred and resentment that spawns terrorist activities against the United States.

Conventional strategies of defense, such as large standing armies, nuclear overkill, and even “Star Wars”-style anti-missile shields, are increasingly irrelevant. America’s ability to deliver massive retaliation affords little deterrence to terrorists, who are anticipating such retaliation and feed on the associated escalation of violence and the potential spread of conflict.

Yet our government continues to rely on these outdated, conventional strategies in order to “create peace”. We are persuaded by strong-arm tactics that scar the earth and mutilate the body because human designed devastation exists within our frame of reference. We can use all the force known to mankind; we can blow a hole through the Earth and cripple the human enterprise, and still we will not eliminate terrorism because we have not removed the conditions that spawn it.

Consider that the United Nations charter states, “Since wars begin in the minds of men, it is the minds of men that the defenses of peace must be constructed”.

The Natural Law Party promotes more harmonious and life-supporting international relations by co-creating solutions that are sustainable and create independence, and by exporting American know-how in areas such as consciousness-based education, sustainable/organic agriculture, preventative/natural health care and sustainable business practices, programs that nourish and promote life, thereby sowing the seeds of trust and friendship among nations.

The Natural Law Party also promotes a new technology, a technology that creates peace in the minds of all, the Invincible Defense Technology. The Invincible Defense Technology applies the most advanced, cutting-edge discoveries in quantum mechanics, neuroscience, and human consciousness to diffuse acute social stress—including the acute religious and ethnic tensions that underlie most violence and acts of terrorism. This approach engages a group of 40,000 trained experts in advanced “technologies of consciousness” specifically engineered to generate this influence of social coherence. During the past 25 years, this approach has been verified to reduce terrorism, crime, and warfare in more than 50 scientific studies published in leading scientific journals. These studies confirm marked reductions in social violence, including 72% reduction in terrorism. This approach works because it focuses on the minds of men to create a permanent, positive peace.
